

PAULUS OF ALEXANDRIA.

Edition and Study:

H. Bart'ikyan, "The Ancient Armenian Translation of the Works of Aratus of Soles and of Paulus of Alexandria," *Banber Mate-nadarani* 12 : 1977, pp. 137-162 (in Armenian with a French résumé).

Bart'ikyan published, with the Greek text *en face*, a fragment of Εἰσαγωγικά by Paulus of Alexandria, a late fourth century pagan astrologer. What is preserved in Armenian is the introduction to the treatise as well as the major part of the chapter dedicated to the Zodiac.
