The goal of this course is to provide students with a greater understanding of corporate finance. The course will cover theoretical concepts learned in the introductory finance course and use these concepts to better understand practical problems faced by firms.

Prerequisites: The course assumes good knowledge of the basic concepts in finance and accounting learned in יסודות המימון.

Grade: The grade for the class will be based on a final exam (85%) and successful completion of homework assignments (15%).

Books: The course will generally follow the textbook by Brealey Myers and Allen, Principles of Corporate Finance, 10th edition. Homework assignments will be given from this book.

Topics to be covered:

1) Valuation of projects under various market conditions
2) Agency Theory and conflicts of interest
3) Linking investments and capital structure decisions
4) Financial and economic distress
5) Dividend policy
6) Mergers and acquisitions
7) Real options
